

Clashing Views on Controversial Issues in Mass Media and Society (Taking Sides Reference Library) [Fourth Edition]

This book contains 36 selections, presented in a pro and con format, addressing 18 different controversial issues in mass communications and society. The purpose of this volume is to create a literate consumer of media - someone who can walk the fine line between a naive acceptance of all media and a cynical disregard for any positive benefits it may offer. Covers such issues as: Is television harmful to children? Should the names of rape victims be published? Should pornography be protected as free speech? Are American values shaped by the mass media? Can public television survive without public funds? Do media have an immediate effect on our behaviors and attitudes? And much more.
