

Antagonistics: Capitalism and Power in an Age of War

Antagonistics addresses central political and theoretical questions: how should we conceive the relations between neo-imperial warfare and neoliberalism, or American hegemony and capitalist globalization? Reflections on the major issues of the new international order are set within a larger framework, tracing the intertwined evolution of the modern state system and the capitalist mode of production, from the Treaty of Westphalia to the Occupation of Iraq. Gopal Balakrishnan interrogates three key political perspectives including Tocqueville's liberalism, Althusser's Marxism and Schmitt on the radical right for their insights on state power and civil society, democracy, and class. Antagonistics combines intellectual history, political philosophy, and historical sociology to produce a highly distinctive portrait of an age of capital and war.
