

Napoleon and His Times: Selected Interpretations

This volume is a collection of 35 selections from the writings of many of the leading historians of the Napoleonic era. French, British, German, Spanish, and American historians are represented. These selections are organized around 11 of the most important problems of which there are differing interpretations, such as Napoleons psychology, the Concordat, the common people in France, nationalism and the destruction of the Napoleonic Empire, the main causes for the defeat in Russia, and the Napoleonic legacy. Eleven of the selections are new translations by the editors. There are maps, an annotated bibliography as well as a supplementary bibliography, and a chronology.
