

The Salinas: Upside down River

The Salinas River is the Central Coasts largest river and has the fourth* largest watershed in California, flowing 170 miles from the mountains in southern San Luis Obispo County northward to Monterey Bay. Most rivers in California flow west or south. Because it flows northward and has one of the largest subsurface flows in the nation, the Salinas River is called the Upside Down River. The Salinas River is an integral part of numerous novels written by John Steinbeck and is the subject of a book written by Anne B. Fisher, *The Salinas, Upside Down River*, (Rivers of America). The Salinas was originally named Rio Monte Rey (the Mountain King River) in 1776 by Juan Bautista de Anza and later renamed the Salinas River. * Within California, only the Sacramento, San Joaquin and Klamath River Watersheds are larger than the Salinas River Watershed.
