

Visions of the End of the Cold War in Europe, 1945-1990 (Contemporary European History)

Exploring the visions of the end of the Cold War that have been put forth since its inception until its actual ending, this volume brings to the fore the reflections, programmes, and strategies that were intended to call into question the bipolar system and replace it with alternative approaches or concepts. These visions were associated not only with prominent individuals, organized groups and civil societies, but were also connected to specific historical processes or events. They ranged from actual, thoroughly conceived programmes, to more blurred, utopian aspirations - or simply the belief that the Cold War had already, in effect, come to an end. Such visions reveal much about the contexts in which they were developed and shed light on crucial moments and phases of the Cold War.
